

Feasibility and investment note

PLACEHOLDER DOCUMENT - NOT FOR CIRCULATION

This file is a placeholder. It occupies the slot reserved for a feasibility and investment note on the Watu Wazuri Afrika Limited publications page, so that the download and preview behaviour of that page can be built and reviewed before the finished document exists.

The published version will carry its method, the partners it was produced with, the period it covers and its limitations. Until it does, nothing in this file should be read as a finding, a commitment or a statement of the organisation's position.

To replace it, save the real PDF over this file, keeping the same name, and update the file size and page count recorded alongside it in the content layer. No code changes are required.
